

FunkyHuawei Mate 10 / Mate 10 Pro Rebranding Instructions

<http://androidzoom.ir/519591/how-to-root-huawei-mate-10/>

Prerequisites:

.\ This version of HiSuite: https://drive.google.com/open?id=0B45NCsO2AL_1cE1xZkNGelFtbmM

.\ FunkyHuawei Mate 10 Tool:
https://drive.google.com/open?id=0B45NCsO2AL_1Um9vLUNiYXlaM1U

.\ The bootloader code for your device.

.\ Be logged into a FunkyHuawei account with least 2 FunkyHuawei credits.

.\ A computer running Windows 7 (Apparently Windows 10 has driver issues with Mate 10)

.\ Fastboot and ADB working with your phone.

.\ The ability to follow instructions and a little bit of courage: It's a new phone!

Steps:

.\ Uninstall any versions of HiSuite previously installed, and install the one linked to in Prerequisites section.

.\ Unzip the FunkyHuawei Mate 10 Tool to your c:\ folder.

NOTE: If you use another folder, make sure there are no non-English characters in the full path.

.\ Plug your phone into your computer and boot it while holding the volume down button to get into Fastboot mode.

.ʹ Open FHMate10Tool.exe and choose Option 1 to root.

NOTE: If your bootloader is not unlocked, the tool will help you unlock it. You will need the code.

NOTE: If you unlock your phone using the tool, open it again and choose Option 1 again to root after unlocking.

.Δ Set up the phone without setting a passcode, without setting a fingerprint, without logging in, etc. Skip everything.

.ʹ When the phone is set up, confirm that you have SuperSU App.

.ʸ Go to Settings -> System -> About phone. Press on Build number until it says "You are now a developer"!

.^ Go to Settings -> System -> Developer Options.

.ʹ Turn on USB Debugging

.ʸ If you have the option to turn on Enable OEM unlock, turn it on. If not, it's not a problem.

.ʸ Run FHMate10Tool.exe and choose the option for the branding you want.

NOTE: For Mate 10 we recommend Asia/International.

NOTE: For Mate 10 Pro we recommend Europe

.ʸ You will need to wait about 1-2 minutes for the process to complete. Once it completes successfully...

.ʸ Go to Settings -> System -> Reset and choose Factory data reset.

.ʸ Make sure Erase internal storage is checked, and choose RESET PHONE, and RESET PHONE again.

.ʸ When your phone boots back up, follow steps 7 - 10 again.

.۱۹ Set your DNS to 213.202.238.238 as described in the instructions here:

<https://funkyhuawei.club/instructions>

.۱۷ Go to <https://funkyhuawei.club> and select the latest firmware for your device.

NOTE: Mate 10 Asia/International is ALP-L29C636

NOTE: Mate 10 Europe is ALP-L09C432

NOTE: Mate 10 Chinese is ALP-AL00C00

NOTE: Mate 10 Pro European is BLA-L29C432

.۱^ Open HiSuite, and connect HiSuite to your phone. Choose to do an update, and make sure the version shows as FunkyHuawei.

.۱۹ Install the update with HiSuite. Installation will fail on the phone around 50%. This is normal.

.۲۰ Now, follow the eRecovery procedure described at the link below, to install the firmware once more.

<https://funkyhuawei.club/instructions>

.۲۱ Do a factory data reset. Congratulations! You're done!
